Submitted (JUN-1996) to the EMBL/GenBank/DDBJ databases.

-!- FUNCTION: CATALYZES THE HYDROLYSIS OF INORGANIC ORTHOPHOSPHATE
FROM PHYTATE (BY SIMILARITY).

-!- CATALYTIC ACTIVITY: MYO-INOSITOL HEXAKISPHOSPHATE.

-!- SUBCELLULAR LOCATION: SECRETED.

-!- SUBCELLULAR LOCATION: SECRETED.

-!- SUMILARITY: BELONGS TO THE HISTIDINE ACID PHOSPHATASE FAMILY.

Gene 163, 19-26, 1995
A;Title: An inducible acid phosphatase from the yeast Pichia pastoris: Characterizati
A;Reference number: JC4285; MUID:96001238
A;Accession: JC4285
acid phosphatase (EC 3.1.3.2) precursor - yeast (Pichla pastoris)
N:Alternate names: orthophosphoric-monoester phosphohydrolase (acid optimum): Pho
C:Species: pichla pastoris
C:Date: 14-Nov-1995 #sequence_revision 08-Feb-1996 #text_change 29-Oct-1999
C:Accession: JC4285
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 181 VVDTAKYFAQGFMKSNYTD------MVEVVALEEEKSQGLNSLTARISCPNYNSHI 230

3-phytase (EC 3.1.3.8) B precursor - Aspergillus ficuum
N.Alternate names: pH 2.5-optimum acid phosphatase
C; Species: Aspergillus ficuum
C; Species: Aspergillus ficuum
C; Species: 14-041-1994 #sequence_revision 19-oct-1995 #text_change 07-May-1999
C; Accession: JN0715; PN0594; PN0460
R; Ehrlich, K.C.; Montalbano, B.G.; Mullaney, E.J.; Dischinger Jr., H.C.; Ullah, A.H.J
Biochem: Biophys. Res. Commun. 195, 53-57, 1993
A; Title: Identification and cloning of a second phytase gene (phyB) from Aspergillus A; Reference number: JN0715; MUD:93371452
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             A;Accession: PN0594
